

Fahad ur Rehman Siddiqui

Date of birth: 01/01/1996 | **Place of birth:** Karachi | **Nationality:** Pakistani | **Gender:**

Male | **Phone:** (+92) 03123015542 (Mobile) | **Email address:** fahadsiddiqui337@gmail.com
| **Address:** 44g razi rd, shahrah-e-faisal karachi pakistan, 17000, Karachi, Pakistan (Home)

● ABOUT MYSELF

Data Analyst with a strong background in Statistics and Data Science. Experienced in transforming complex datasets into meaningful business insights using Python, R, SQL, Excel, and Power BI. Skilled in data analysis, visualization, statistical reporting, and dashboard development to support data-driven decision-making. Passionate about solving real-world business problems through analytics and delivering impactful insights through modern data tools and technologies.

● WORK EXPERIENCE

30/06/2025 - CURRENT - KARACHI, PAKISTAN

VISITING FACULTY - DATA SCIENCE APTECH SFC

As a Visiting Faculty member in Data Science, I deliver lectures and practical training sessions on Python programming, data analysis, statistics, machine learning, and data visualization. I design course materials, assignments, and hands-on projects to help students develop practical analytical and problem-solving skills. I also mentor students on real-world data projects, evaluate their performance through assessments and presentations, and guide them in applying modern data analytics techniques aligned with current industry practices.

30/06/2023 - CURRENT - KARACHI, PAKISTAN

DATA ANALYST CLOUDSTAFF TECHNOLOGIES, KARACHI, PAKISTAN

As a Data Analyst, I analyzed large datasets using Python, R, SQL, and Excel to support business and operational decision-making. I developed automated reporting workflows and interactive dashboards using Power BI to deliver meaningful insights and KPI tracking. I performed data cleaning, validation, and statistical analysis to ensure data accuracy and identify key trends and performance indicators. I also collaborated with different teams to understand business requirements and provide effective data-driven solutions for improved efficiency and strategic planning.

31/10/2022 - 29/06/2023 - KARACHI, PAKISTAN

JR RESEARCH ANALYST SYSCROWD, KARACHI, PAKISTAN

As a Research and Data Analyst, I performed data collection, cleaning, and exploratory data analysis to support research projects and business insights. I conducted statistical analysis to identify patterns, correlations, and trends within datasets, helping improve data-driven decision-making. I also assisted in developing analytical models and preparing structured reports, dashboards, and visual summaries for internal teams and stakeholders.

● EDUCATION & TRAINING

01/01/2024 - 30/06/2025 - KARACHI, PAKISTAN

POSTGRADUATE DIPLOMA IN DATA SCIENCE & ARTIFICIAL INTELLIGENCE- NED UNIVERSITY OF ENGINEERING & TECHNOLOGY, KARACHI, PAKISTAN

- Final Year Project (Thesis): Student Performance Prediction using Machine Learning
- Built an end-to-end predictive analytics system using Python to forecast student academic performance
- Processed and analyzed 100+ structured student records using Pandas and NumPy
- Applied Linear Regression and Random Forest models; selected Linear Regression based on higher accuracy and interpretability
- Evaluated model performance using R^2 and Mean Absolute Error (MAE)
- Identified key performance predictors including study hours, attendance percentage, and absenteeism
- Developed a desktop-based analytical application with PyQt5 and automated PDF report generation
- Created data visualizations (correlation heatmaps, bar charts, scatter plots) to support data-driven decisions
- Gained strong expertise in Python, SQL, statistical analysis, machine learning, and data visualization

Level in EQF: 7

01/01/2018 - 25/12/2021 - HYDERABAD, PAKISTAN

BACHELOR OF SCIENCE IN STATISTICS- UNIVERSITY OF SINDH, JAMSHORO, PAKISTAN

- Core statistical theory including probability distributions, hypothesis testing, and regression analysis
- Quantitative data analysis and interpretation using mathematical and statistical methods
- Sampling techniques and survey design for data-driven research
- Statistical computing and data handling using software tools
- Analytical thinking and problem-solving using numerical and mathematical language
- Research projects involving real datasets and applied statistical analysis

Level in EQF: 6

● **PUBLICATIONS**

Predicting Academic Barriers in Low-Resource Education Systems: Insights from Portuguese Student Data Applied to Private Schools in Pakistan 2025

This study applies machine learning models to identify key academic risk factors using a structured Portuguese secondary-school dataset and conceptually adapts the findings to private schools in Pakistan. The research employs Logistic Regression, Random Forest, and SVM models, achieving predictive accuracy above 92%. Key predictors include absenteeism, prior academic failures, study time, and family support. The study demonstrates how global educational datasets can inform data-driven intervention strategies in lowresource educational environments.

Fahad ur Rehman JUTLP Manuscript under preparation / Under review

● **CERTIFICATIONS**

16/03/2022 OpenEDG Python Institute (in collaboration with Cisco Networking Academy)

PCAP: Programming Essentials in Python

Online - Certified in core Python programming concepts including variables, data structures, control flow, functions, exception handling, and object-oriented programming (OOP). Gained hands-on experience in writing efficient Python code using standard libraries and applying best practices for problem-solving and software development.

31/07/2022 Jawan Pakistan

Online Data Science Course

Completed an intensive data science program covering Python programming, data analysis, data cleaning, exploratory data analysis (EDA), and basic machine learning concepts. Worked with real-world datasets and developed analytical and data-driven problem-solving skills.
